RESORT

The Svatá Kateřina Resort is a place of harmonic lifestyle and healthy diet. Therefore, nutritional values of each meal are indicated in this menu.

How can you use this information for your health and slim line?

An average woman weighing about 60 kg burns on average 2,000 kcal of energy every day. For a man weighing 90 kg it is about 2,800 kcal.

For example, if you spend an hour working out in a fitness center or if you treat yourself to one hour in wellness, take an hour walk or ride on horseback for half an hour, you consume on average 500–700 kcal.

The remaining energy of 1,300 – 2,100 kcal covers basic life functions and other activities. Therefore, daily energy intake gained from your diet of about 2,500 kcal or 3,500 kcal is considered adequate reflecting the above activities.
